

Below is a list of some of the projects we're hoping to do. Choose a project and share your ideas and dreams about it with us!

- Add a stage, seats, a play area, and prayer garden outside
- Create a solar farm, so we can get all the church's power from the sun
- Add to the new kids' spaces that we've created upstairs
- Remodel Chadwick Hall (the big room where we share meals together)

In Greeley for Good Kids!

A guide for understanding and participating in our capital campaign

Your Name: _____

What's going on? What's a capital campaign?

Our church is doing a "capital campaign." Our church community is coming together as a big team. We want to make our building and property more inviting for everyone. We are putting our money together to make a big dream come true that will make a difference in our community. We want to be in Greeley for good - for a long time and to make a positive difference in our city.

When everyone comes together to give what they can, God turns it into something really big! And even kids can help make a difference!

But, why are we doing it?

We want our building and property to be a place where people feel God's love. We want it to look beautiful and inviting. We also want to make sure we are taking good care of our property so it is around for a long time!

So, what will change?

When people drive past, we want people to see that we care about our city and God's world, so we want to make our front yard water-responsible. We are working on putting in lots of plants that need less water than our big lawn. We hope to put in places to play, gather, and pray outside.

When people come into our building, we want our building to show how much we love others by having it be a beautiful and inviting space. We will put in new art pieces and new furniture. We also want to do some not-so-fancy things, like replace air conditioners, sprinkler lines, and lights, and the roof. We will also move some bathrooms around. That might not seem exciting, but it helps our building work better and stay around for a long time!

Use this space to create - draw, write, glue, cut, and more to help us understand what matters to YOU! Need more space? Grab more paper!

What's something that you LOVE about our church, inside or outside?

What new or different idea do you have that would make you love our spaces even more?
